

SETSMART (SET Market Analysis and Reporting Tool)

New Generation Software for SET Information Products

SETSMART (or abbreviated from **SET Market Analysis and Reporting Tool**) is the web-based application that seamlessly integrates comprehensive sources of Thai listed company information i.e. real-time stock prices, historical trading prices and indices, listed company profile and historical news.

The application is designed to be user-friendly with many functions for self-learning. All kinds of data available in SETSMART can easily be exported through Microsoft Excel for further use.

Market Summary

Auto Refresh: Off On Last update 10/03/2004 17:00:57
